SECTION A

Please answer the following questions

1. Yes No Is the indication or diagnosis for the treatment of severe asthma with an eosinophilic phenotype?
2. Yes No Will the requested medication be concurrently used with Xolair or another Anti-Interleukin (IL) Monoclonal Antibody?
3. Yes No Will the requested medication be used as a single agent?
4. Yes No Does the member have blood eosinophil level greater than or equal to 150 cells per microliter?
5. Yes No Is the prescription written or recommended by a Pulmonologist, Immunologist, or Allergy Specialist?
6. Is this medication a new initiation or a continuation?
 Initiation (**proceed to question 7**)
 Continuation (**proceed to question 8**)
7. Yes No Has the member been unable to achieve adequate asthma control while on maximum tolerated inhaled corticosteroid therapy (e.g. mometasone greater than 400mcg daily, fluticasone greater than 440 mcg daily) in combination with a long acting beta agonist?
8. Yes No Is the member stable on therapy and will continue on asthma controller inhalers?

Please document the symptoms and/or any other information important to this review:

Our response time for prescription drug coverage standard requests is 72 hours. If you or your prescriber believe that waiting 72 hours for a standard decision could seriously harm your life, health, or ability to regain maximum function, you can ask for an expedited (fast) decision. If your prescriber indicates that waiting 72 hours could seriously harm your health, we will automatically give you a decision within 24 hours. If you do not obtain your prescriber's support for an expedited request, we will decide if your case requires a fast decision. You cannot request an expedited coverage determination if you are asking us to pay you back for a drug you already received. View our formulary and Prior Authorization criteria online at <http://www.scanhealthplan.com>
