

SCAN Provider Groups:

Inside you will find further descriptions of the requirements of a Health Education program as well as a variety of materials, resources and templates that can be used to help you create a comprehensive program. Our goal is to help provider groups deliver high quality, culturally-sensitive health education materials and programs to all members. The binder is designed as a reference when starting or enhancing your health education program.

Any questions can be directed to: healtheducation@scanhealthplan.com
